

Material Safety Data Sheet

431-8360 OPTICLEAR 900 LOW VOC (60 SHEEN)

Product and company identification 1.

Code:Synonym:Material uses:	431-8360 OPTICLEAR 900 LOW VOC (60 SHEEN) Coatings: Surface coatings and finishes.
Manufacturer :	Chemcraft® Coating Technology Inc. 311 Otterson Drive, Suite 60 Chico, CA 95928 Ph:530-894-3585 Fax:530-896-0657
In case of emergency :	1-800-424-5571
Validation date:Print date:Validator:	4/25/2007. 9/11/2007. K. DeBiasi

2. **Hazardous** ingredients

Name	CAS number	<u>%</u>
Acetone	67-64-1	30 - 50
n-Butyl acetate	123-86-4	15 - 30
Isobutyl alcohol	78-83-1	5 - 15
Isopropanol	67-63-0	5 - 15
Propylene glycol monomethyl ether acetate	108-65-6	1 - 5
Ethyl alcohol	64-17-5	0.1 - 1

Trace impurities and additional material names not listed above may appear in other sections of this MSDS. These materials may be listed for toxicological concerns, local compliance, or other reasons.

* Toxicological information, if available, is listed in section 11

3. **Hazards identification**

Physical state

: Liquid.

OSHA/HCS status

: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

OSHA: Standard for Occupational Exposure to Formaldehyde 29CFR 1910.1048 must be consulted before initial use of product.

Routes of entry	: Dermal contact. Eye contact. Inhalation. Ingestion.
Effects of Acute Exposure	: Not applicable.
Potential chronic health effects	 CARCINOGENIC EFFECTS: Classified A5 (Not suspected for humans.) by ACGIH, 4 (Probably not for humans.) by IARC, None. by OSHA [2-Propanone]. Classified D (Not classifiable for humans or animals.) by EPA [2-Propanone]. Classified A4 (Not classifiable for humans or animals.) by ACGIH [Ethanol]. Classified A5 (Not suspected for humans.) by ACGIH, 4 (Probably not for humans.) by IARC [Phosphoric acid, monobutyl ester]. Classified 4 (Probably not for humans.) by IARC [Silica gel, pptd., crystfree]. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Classified None. for humans [2-Propanone].
Medical conditions aggravated by over- exposure See toxicological information	: Repeated or prolonged exposure to the substance can produce target organs damage.

4. First aid measures

Eye contact	 Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Skin contact	 Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Inhalation	: Move exposed person to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if symptoms occur. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Ingestion	: Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if symptoms occur. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.

5. Fire-fighting measures

Flammability of the product	: Flammable.
Products of combustion	: These products are carbon oxides (CO, CO ₂).
Extinguishing media	
Suitable	: Use an extinguishing agent suitable for the surrounding fire.
Not suitable	: None known.
Special exposure hazards Special Remarks on Fire Hazards	No specific hazard. FLAMMABLE. (2-Propanone)
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Fire Hazards in Presence of Various Substances	: Extremely flammable in the presence of the following materials or conditions: open flames sparks and static discharge. Highly flammable in the presence of the following materials or conditions: heat.
Explosion Hazards in Presence of Various Substances	: Highly explosive in the presence of the following materials or conditions: open flames, sparks and static discharge, heat and shocks and mechanical impacts.

6. Accidental release measures

Personal precautions	:	Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment.
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Methods for cleaning up	:	If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

7. Handling and storage

Handling

Skin

Hands

Respiratory

- : Wash thoroughly after handling.
- **Storage** : Keep container tightly closed. Keep container in a cool, well-ventilated area.

8. Exposure controls/personal protection

Consult local authorities for acceptable exposure limits.

Engineering measures	: No special ventilation requirements. Good general ventilation should be sufficient to control airborne levels. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.
Personal protection	
Eyes	: Safety eyewear complying with an approved standard should be used when a risk

- Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.
 Personal protective equipment for the body should be selected based on the task being
 - Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
 - : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
 - : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
- **Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

9. Physical and chemical properties

-	
Physical state	: Liquid.
Flash point	: The lowest known value is Closed cup: -18°C (-0.4°F). (T.C.C.). (2-Propanone)
Auto-ignition temperature	: The lowest known value is 407°C (764.6°F) (Acetic Acid, Butyl Ester).
Flammable limits	 The greatest known range is Lower: 1.3% Upper: 13.1% (2-Propanol, 1-methoxy, acetate)
Boiling/condensation point	: The lowest known value is 56.2°C (133.2°F) (2-Propanone). Weighted average: 92.53°C (198.6°F)
Melting/freezing point	 May start to solidify at -48°C (-54.4°F) based on data for: 1,2-Benzenedicarboxylic acid, di-C(8-10)-branched alkyl esters, C9-rich. Weighted average: -90.82°C (-131.5°F)
Relative density	: 0.8909 (Water = 1)
Vapor pressure	: The highest known value is 24.1 kPa (181 mm Hg) (at 20°C) (2-Propanone). Weighted average: 14.92 kPa (111.91 mm Hg) (at 20°C)
Vapor density	 The highest known value is 4.6 (Air = 1) (1,2-Benzenedicarboxylic acid, di-C(8-10) -branched alkyl esters, C9-rich). Weighted average: 2.68 (Air = 1)
Evaporation rate	 The highest known value is 1 (Acetic Acid, Butyl Ester) Weighted average: 0.89compared with Butyl acetate.
Dispersibility properties	 Not dispersible in cold water, hot water, methanol. See solubility in methanol, diethyl ether, n-octanol, acetone.
Solubility	 Easily soluble in methanol, diethyl ether, acetone. Partially soluble in n-octanol. Insoluble in cold water, hot water.

10. Stability and reactivity

Stability and reactivity	: The product is stable.
Conditions of instability	: Avoid contact with oxidizing agents. (Benzene, (1-methylethenyl)-)
Incompatibility with various substances	 Reactive or incompatible with the following materials: oxidizing materials, reducing materials, acids and alkalis. Slightly reactive or incompatible with the following materials: organic materials.

11. Toxicological information

Toxicity data				
Product/ingredient name	<u>Test</u>	<u>Result</u>	<u>Route</u>	Species
2-Propanone	LD50	5800 mg/kg	Oral	Rat
	LD50	3000 mg/kg	Oral	Mouse
	LD50	20000 mg/kg	Dermal	Rabbit.
	LC50	50100 mg/m ³ (8	Inhalation	Rat
	LC50	hour/hours) 44000 mg/m³ (4	Inhalation	Mouse
		hour/hours)		
Acetic Acid, Butyl Ester	LD50	14130 mg/kg	Oral	Rat
	LD50	7100 mg/kg	Oral	Mouse
	LD50	5000 mg/kg	Dermal	Rabbit
1-Propanol, 2-methyl-	LD50 LD50	8770 mg/kg 2500 mg/kg	Dermal Oral	Guinea pig Rat.
	LD50	3200 mg/kg	Oral	Mouse
	LD50	4200 mg/kg	Dermal	Rabbit.
	for humans.) b monobutyl este crystfree]. TERATOGEN	y ACGIH, 4 (Probably er]. Classified 4 (Probal I C EFFECTS : Classifie rial which causes dama	not for humans.) bly not for humar ed None. for hum	ol]. Classified A5 (Not suspected by IARC [Phosphoric acid, ns.) by IARC [Silica gel, pptd., nans [2-Propanone]. ng organs: blood, kidneys, lungs,
Other toxic effects on humans		s in case of ingestion, o ous in case of skin con		
Special remarks on toxicity to animals	: In laboratory inhalation studies, birth defects, increased foetal lethality and delayed foetal development have been observed in offspring of female animals, exposed during pregnancy, with a threshold response level in the range of 545 ppm concentration in the air. (1-Propanol, 2-methoxy-, acetate)			
Special remarks on chronic effects on humans	: 0070 Passes t (1-Propanol, 2	through the placental b 2-methyl-)	arrier in human.	
Special remarks on other toxic effects on humans	: Material is irrita	ating to mucous membr	ranes and upper	respiratory tract. (2-Propanone)
Specific effects				
Carcinogenic effects	: No known sign	ificant effects or critica	l hazards.	
Mutagenic effects	•	ificant effects or critica		
Teratogenicity /	•	ificant effects or critica		
Reproductive toxicity				

12. Ecological information

Environmental precautions	: No known significant effects or critical hazards.
Octanol/water partition coefficient	: The product is more soluble in octanol.
Bioconcentration factor	: Not available.
Products of degradation	: These products are carbon oxides (CO, CO ₂) and water.
Toxicity of the products of biodegradation	: The product itself and its products of degradation are not toxic.

13. Disposal considerations

Waste disposal	: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times
	comply with the requirements of environmental protection and waste disposal legislation
	and any regional local authority requirements.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

The information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.
