1. Product and company identification			
	Prepared by		
	Akzo Nobel Coatings Inc.		
Prepared for	1431 Progress Ave.		
ATTN:	High Point, NC 27261 US		
Chemcraft			
1431 Progress Ave.	(336)841-5111		
J	In case of emergency (Health or Spills):		
High Point, NC 27260 US	CHEMTREC (US and Canada) (800) 424-9300		
Product	t no. : 824-5105MCG		
Product - Cl	lass : Promatch® Aqua Harvest		
Customer Part Num			
Customer ShipTo	o ID : 0000109024		
2. Hazards ide	entification		
Physical state	: Liquid.		
OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication S (29 CFR 1910.1200).	Standard	
Emergency overview	: WARNING!		
	CAUSES SEVERE SKIN IRRITATION. HARMFUL IF INHALED, ABSORBED THROUGH SKIN OR SWALLOWED. CAUSES EYE IRRITATION. MAY CAU RESPIRATORY TRACT IRRITATION. CONTAINS MATERIAL THAT MAY C TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA. POSSIBLE CANCI HAZARD - CONTAINS MATERIAL WHICH MAY CAUSE CANCER, BASED O ANIMAL DATA. POSSIBLE BIRTH DEFECT HAZARD - CONTAINS MATER WHICH MAY CAUSE BIRTH DEFECTS, BASED ON ANIMAL DATA.	USE AUSE ER ON	
	Do not breathe vapor or mist. Do not ingest. Do not get in eyes or on skin or Avoid exposure during pregnancy. Use only with adequate ventilation. Keep tightly closed and sealed until ready for use. Wash thoroughly after handling.		
Routes of entry	: Dermal contact. Eye contact. Inhalation. Ingestion.		
Potential acute health effe	ects		
Inhalation	: Toxic by inhalation. Slightly irritating to the respiratory system.		
	Other effects of inhalation may include: blindness, blood effects, blurred visio effects, cramps, cyanosis, dizziness, drowsiness, fatigue, headache, kidney da liver damage, nausea, shortness of breath, weakness,		
Ingestion	: Toxic if swallowed.		
	Other effects of ingestion may include : abdominal pain, blindness, blood effe effects, cramps, cyanosis, diarrhea, dizziness, drowsiness, fatigue, headache, kidney damage, liver damage, nausea, vomiting, weakness,		
Oldin	. Toxic in contact with akin. Soverally irritating to the akin		

Skin : Toxic in contact with skin. Severely irritating to the skin. Other effects of skin contact may include: dehydration, dermatitis, discoloration,

Date of printing

2. Hazards identification

		Effects due to absorption through skin may include: blood effects, CNS effects, cramps, cyanosis, diarrhea, dizziness, fatigue, headache, nausea, vomiting, weakness,
Eyes	1	Irritating to eyes.
		Other effects of eye contact may include : eye damage, redness, tearing,
Potential chronic health effe	cts	
Carcinogenicity	:	Contains material which may cause cancer, based on animal data. Risk of cancer depends on duration and level of exposure.
Mutagenicity	:	No known significant effects or critical hazards.
Teratogenicity	1	Contains material which may cause birth defects, based on animal data.
Target organs	:	Contains material which may cause damage to the following organs: blood, kidneys, lungs, liver, heart, brain, eyes, central nervous system (CNS).
Medical conditions aggravated by over- exposure	:	skin disorders, liver conditions, kidney conditions, respiratory conditions, neurological disorders, cardiovascular diseases,

NOTICE: Reports have associated repeated and prolonged OVEREXPOSURE to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents of this package may be harmful or fatal.

See toxicological information (Section 11)

3. Composition/information on ingredients				
Name methyl alcohol	CAS number % by w 67-56-1	eight <u>Vapor pressure</u> 13 kPa (97.68 mm Hg) [20℃]	Exposure limits ACGIH TLV (United States). Absorbed through skin. TWA: 200 ppm 8 hour(s). STEL: 250 ppm 15 minute(s). OSHA PEL (United States). TWA: 200 ppm 8 hour(s).	
2-butoxyethanol	111-76-2	0.088 kPa (0.66 mm Hg) [20℃]	ACGIH TLV (United States). TWA: 20 ppm 8 hour(s). OSHA PEL (United States). Absorbed through skin. TWA: 50 ppm 8 hour(s).	
titanium dioxide	13463-67-7	Not available.		

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid mea	asures
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.
Eye contact	: Get medical attention immediately if symptoms occur. Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids.
Skin contact	: Get medical attention immediately if symptoms occur. In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Inhalation	: Get medical attention immediately if symptoms occur. Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband.

824	-5105MCG	0000109024	2/2/2011.	3/7
4.	First aid meas	sures		
Inges	tion :	swallowed and the exposed person is Stop if the exposed person feels sick a	ash out mouth with water. If material has conscious, give small quantities of water as vomiting may be dangerous. Do not ir edical personnel. Never give anything b	to drink. nduce
5.	Fire-fighting r	neasures		
Flam	mability of the product	: In a fire or if heated, a pressure incr	ease will occur and the container may bu	urst.
Flash	point	: Closed cup: >93.3℃ (>200.0뚜)		
Flam	mable limits	: Lower: 1.13% Upper: 36%		
Exting	<u>guishing media</u>			
Suit	able	: Use an extinguishing agent suitable	for the surrounding fire.	
Not	suitable	: None known.		
Speci	ial exposure hazards		ving all persons from the vicinity of the in- ken involving any personal risk or withou	
	rdous thermal mposition products	: Decomposition products may includ carbon dioxide carbon monoxide	e the following materials:	
	ial protective ment for fire-fighters		e protective equipment and self-containe ece operated in positive pressure mode.	
Speci hazar	ial remarks on fire rds	: Not available.		
	ial remarks on sion hazards	: Not available.		

6. Accidental release measures

Personal precautions	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).
Environmental precautions	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up	
Small spill	Stop leak if without risk. Move containers from spill area. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

7. Handling and storage

Handling	: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Avoid exposure during pregnancy. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Storage	: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.Personal protectionSelection of personal protective equipment (PPE) is to be established by the employer performing a PPE hazard assessment. In the U.S.A, OSHA requires completion of a documented PPE hazard assessment as described in 29 CFR 1910.132.Respiratory: Use properly fitted respiratory protection complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes. Wet sanding/inting should be used wherever possible. If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used.Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.Skin: Personal protective equipment for the body should be selected based on the task being	Engineering measures	:	Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
performing a PPE hazard assessment. In the U.S.A, OSHA requires completion of a documented PPE hazard assessment as described in 29 CFR 1910.132.Respiratory: Use properly fitted respiratory protection complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes. Wet sanding/flatting should be used wherever possible. If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used.Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	Hygiene measures	:	eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers
 assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. 9. Physical and chemical properties

•		
Physical state	uid.	
Burning time	t applicable.	
Burning rate	t applicable.	
Color	t available.	
Odor	t available.	
Taste	t available.	
Molecular weight	t applicable.	
Molecular formula	t applicable.	
рН	t available.	
Boiling/condensation point	to 171.11℃ (149 to 340年)	
Melting/freezing point	t available.	
Critical temperature	t available.	
Relative density	97	
Vapor density	hter than air	
Volatility	.63% (w/w)	
Odor threshold	t available.	
Evaporation rate	phest known value: Greater than 1. (methyl alcohol) compared with bu	tyl acetate
Viscosity	t available.	
lonicity (in water)	t available.	
Dispersibility properties	t available.	
Solubility	t available.	

10. Stability and reactivity

Chemical stability	: The product is stable, under normal conditions of storage and use.
Hazardous polymerization	: Will not undergo hazardous polymerization.
Conditions to avoid	: No specific data. Other Conditions to avoid: freezing, drying out,
Materials to avoid	: Reactive or incompatible with the following materials: oxidizing materials, metals, acids and alkalis.
Hazardous decomposition products	: Not available.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.

Disposal considerations 13.

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

14. Transport information

Information contained in this section may vary from the actual shipping description depending on quantity in Note: containers, mode of shipment and use of exemptions.

Regulatory information	UN number	Proper shipping name	Classes	PG*	Label	Additional information

Notice to reader

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.

Brand names mentioned in this data sheet are trademarks of or are licensed to Akzo Nobel.
