

Material Safety Data Sheet

825-8000 INTERMIX W/S STAIN

Product and company identification

825-8000 Code

Synonym : INTERMIX W/S STAIN

Material uses : Coatings: Surface coatings and finishes.

Manufacturer : Chemcraft® Coating Technology Inc.

311 Otterson Drive, Suite 60

Chico, CA 95928

Ph:530-894-3585 Fax:530-896-0657

In case of emergency 1-800-424-5571

Validation date 5/5/2006. **Print date** 2/8/2007. K. William **Validator**

Hazardous ingredients

Name CAS number <u>%</u> 50 - 70 Light aromatic naphtha 64742-95-6 1,2,4-Trimethylbenzene 95-63-6 15 - 301330-20-7 **Xylenes** 1 - 5

Trace impurities and additional material names not listed above may appear in other sections of this MSDS. These materials may be listed for toxicological concerns, local compliance, or other reasons.

Hazards identification

: Liquid. **Physical state**

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard

(29 CFR 1910.1200).

Routes of entry : Inhalation. Ingestion.

Effects of Acute

Exposure

Risk of cancer depends on duration and level of exposure.

Potential chronic health

effects

: CARCINOGENIC EFFECTS: Classified 4 (Probably not for humans.) by IARC, None. by

OSHA [2-Butanone, oxime].

MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available.

Medical conditions aggravated by overexposure

: Repeated or prolonged exposure to the substance can produce target organs damage.

See toxicological information (section 11)

First aid measures

Eye contact

: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical

attention if irritation occurs.

Skin contact

: Flush contaminated skin with plenty of water. Continue to rinse for at least 10 minutes. Get medical attention. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing or wear gloves. Wash clothing before reuse. Clean shoes thoroughly before reuse.

2/8/2007. Page: 1

^{*} Toxicological information, if available, is listed in section 11

First aid measures

Inhalation

: Get medical attention immediately. Move exposed person to fresh air. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or selfcontained breathing apparatus. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxyge by trained personnel. It may be dangerous to the person providing aid to give mouthto-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion

: Get medical attention immediately. Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Protection of first-aiders

: No action shall be taken involving any personal risk or without suitable training.

Fire-fighting measures

Flammability of the product

Products of combustion

Extinguishing media

Suitable

Not suitable

Fire Hazards in Presence

Special exposure hazards Special Remarks on Fire Hazards **Special protective**

equipment for fire-fighters of Various Substances

Explosion Hazards in Presence of Various Substances

: Flammable.

: These products are carbon oxides (CO, CO₂). Some metallic oxides.

: Use an extinguishing agent suitable for the surrounding fire.

 None known. : No specific hazard.

Vapor may travel considerable distance to source of ignition and flash back. (Solve naphtha (petroleum), light arom.)

- : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- : Highly flammable in the presence of the following materials or conditions: open flame sparks and static discharge.

Non-flammable in the presence of the following materials or conditions: heat, shocks a mechanical impacts, oxidizing materials, reducing materials, combustible materials, orga materials, metals, acids, alkalis and moisture.

Highly explosive in the presence of the following materials or conditions: open flames, sparks and static discharge.

Non-explosive in the presence of the following materials or conditions: heat, shocks and mechanical impacts, oxidizing materials, reducing materials, combustible materials, organic materials, metals, acids, alkalis and moisture.

Accidental release measures

Personal precautions

: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment.

Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up

: If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

2/8/2007. Page: 2

7. Handling and storage

Handling: Wash thoroughly after handling.

Storage : Keep container tightly closed. Keep container in a cool, well-ventilated area.

8. Exposure controls/personal protection

Consult local authorities for acceptable exposure limits.

Engineering measures

: Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Personal protection

Eyes

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

Skin

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory

: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Hygiene measures

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropria techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety shower are close to the workstation location.

9. Physical and chemical properties

Physical state

: Liquid.

Flash point

: The lowest known value is Closed cup: 24°C (75.2°F). (Tagliabue.). Open cup: 37.8°C (100°F). (Cleveland). (Benzene, dimethyl-)

Auto-ignition temperature Flammable limits

The lowest known value is 465°C (869°F) (Solvent naphtha (petroleum), light arom.).
The greatest known range is Lower: 0.6% Upper: 7% (Solvent naphtha (petroleum),

light arom.)

Boiling/condensation point

: The lowest known value is 100°C (212°F) (Water). Weighted average: 154.85°C (310.7°F)

Melting/freezing point

: May start to solidify at 0°C (32°F) based on data for: Water. Weighted average: -48.33°((-55°F)

Relative density

: Weighted average: 0.9 (Water = 1)

Vapor pressure

: The highest known value is 2.3 kPa (17.2 mm Hg) (at 20°C) (Water). Weighted average: 0.45 kPa (3.38 mm Hg) (at 20°C)

Vapor density

: The highest known value is 4.14 (Air = 1) (1,2,4-Trimethylbenzene). Weighted average: 3.99 (Air = 1)

Dispersibility properties

: Not dispersible in cold water, hot water. See solubility in methanol, diethyl ether, n-octanol, acetone.

Solubility

: Easily soluble in diethyl ether, n-octanol, acetone.

Soluble in methanol.

Insoluble in cold water, hot water.

2/8/2007. Page: 3

10. Stability and reactivity

Stability and reactivity

Incompatibility with various substances

: The product is stable.

Highly reactive or incompatible with the following materials: oxidizing materials. Reactive or incompatible with the following materials: reducing materials, organic materials, metals, acids and alkalis.

Non-reactive or compatible with the following materials: combustible materials and moisture.

11. Toxicological information

Toxicity data

Product/ingredient name Result **Species** Test Route 6960 mg/kg Solvent naphtha (petroleum), light LD50 Oral Rat. arom. LD50 Oral Rat **Xylenes** 4300 mg/kg

Chronic effects on humans

: CARCINOGENIC EFFECTS: Classified 4 (Probably not for humans.) by IARC, None. by

OSHA [2-Butanone, oxime].

Contains material which causes damage to the following organs: kidneys, the nervous system, liver.

Other toxic effects on humans

: Very hazardous in case of ingestion. Hazardous in case of inhalation.

Special remarks on chronic effects on humans

: Prolonged or repeated contact with skin can cause defatting and drying of the skin resulting in skin irritaion and dermatitis. Prolonged exposure to high vapour concentration can cause headache, dizziness, nausea and central nervous system

High level exposure to Xylene in laboratory animals, often at levels which are toxic to the mother, have affected the development of the fetus. The revelance of this to humans is not known. (Benzene, dimethyl-)

Special remarks on other toxic effects on humans **Specific effects**

: Material is irritating to mucous membranes and upper respiratory tract. Narcotic in high concentrations. (Solvent naphtha (petroleum), light arom.)

Carcinogenic effects

: Contains material which may cause cancer. Risk of cancer depends on duration and level of exposure.

Mutagenic effects Teratogenicity / Reproductive toxicity : No known significant effects or critical hazards.

: No known significant effects or critical hazards.

. Ecological information

Environmental precautions

Octanol/water partition coefficient

: No known significant effects or critical hazards.

: The product is much more soluble in octanol.

Bioconcentration factor

: Not available.

Products of degradation

: These products are carbon oxides (CO, CO₂) and water. Some metallic oxides.

Toxicity of the products of

: The product itself and its products of degradation are not toxic.

biodegradation

2/8/2007. Page: 4

13. Disposal considerations

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

The information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.
