

JUST SAY  
**NO!**  
TO WOOD JIGS

**Stop Wasting Time!**

**TP-1934**

**Install Cabinet Hardware in Seconds.**

The days of measuring each door or drawer by hand or using a block of wood are over! Save time, save mistakes. True Position Hardware Jig makes short work of any hardware layout. Save hours of set-up time on handles and knobs. Simply adjust sliding brackets along the english & metric scale, tighten thumbscrews and drill! You will be amazed how easy hardware is to install!

1 Set hardware spacing using english/metric ruler

2 Adjust to desired location on style and rail, then tighten thumbscrews

3 Hold in place and drill

Easily center on any width of drawer front with included center notch. Centers hardware on drawer fronts up to 16" tall
